

Anivirudhan Ramesh

+91 8825694862 | anivirudhan.ramesh@outlook.com | [LinkedIn](#) | [GitHub](#)

Data analytics professional with 3 years of experience leveraging Python, SQL, ETL, Power BI, and cloud tools to insights across HR, insurance, sales, and logistics. Skilled in automation, dashboard development, and scalable data solutions, combining analytical and software engineering expertise to drive efficiency and accuracy.

TECHNICAL SKILLS

Programming & Databases : Python (Pandas, NumPy, Matplotlib, Seaborn), Java, SQL Server, MySQL, PostgreSQL
SQL & BI Reporting : SQL (Stored Procedures, CTEs, Window Functions), Power BI, DAX, Excel (Index-Match, XLOOKUP, Pivot tables, Power Pivot), Report Design, Query Optimization.
Data Analysis & Statistics : EDA, Data Modeling, Descriptive Statistics, Correlation Analysis, Hypothesis Testing
Cloud & Tools : AWS (S3, EC2, Glue, Redshift, CLI), Azure Databricks, AutoSys, PuTTY, WinSCP, SSMS, Git
Machine Learning : Feature Engineering, Linear & Logistic Regression, SVM, XG Boost, Model Evaluation

EXPERIENCE

Tesco, United Kingdom - Systems Analyst

Sep 2024 – Jan 2026

- Automated payroll and workforce reporting for 1,000+ employees using Power BI and Excel, improving efficiency by 20% and ensuring 99% data accuracy.
- Integrated Tribepad recruitment data into payroll workflows, reducing delays by 15%.
- Coordinated across teams to deliver dashboards improving payroll accuracy and workforce insights.

Victoria Solutions, Remote (UK) - Data Analyst Intern

May 2025 – Jun 2025

- Analyzed and cleaned 50K+ records using Python and SQL, improving data accuracy by 10%.
- Designed Power BI dashboards automating reports, cutting manual effort by 20%.
- Applied machine learning for predictive insights, boosting analytical and reporting efficiency.

Colchester Institute, UK - Reporting Analyst

Jan 2024 – Aug 2024

- Optimized 15+ HR and payroll workflows for over 800 employees, improving integration by 20% and ensuring GDPR-compliant, accurate analytics across departments.
- Automated Power BI dashboards and Excel reports to track KPIs, enhancing data-driven workforce decisions and boosting reporting efficiency and user adoption by 15%.

Coforge, Greater Noida - Data Engineer

Aug 2021 – Sep 2022

- Led financial impact modeling for an insurance client using SQL, Python, and Excel, assessing how rule changes affected profitability.
- Improved data migration efficiency by 30% using PuTTY, WinSCP, and Python ETL scripts, leveraging AWS services like S3 and EC2.
- Devised Python automation scripts and internal tools for data validation, ETL workflows, and reporting optimization, enhancing accuracy and efficiency.
- Orchestrated validation and reconciliation across multiple AWS S3 data sources, ensuring data consistency across pipelines.
- Streamlined data workflows via AWS Glue and Redshift, improving speed and scalability.
- Boosted query performance by 30% through SQL optimization and advanced data modeling in SSMS and Excel.
- Maintained seamless data flow by managing data upload/retrieval and automating AWS CLI and AutoSys tasks, reducing data processing time by 40%.
- Collaborated with cross-functional teams across time zones in a remote setup, ensuring timely delivery and alignment with global business goals for a Fortune 200 insurance client.

PROJECTS

Credit Risk Analysis Domain: Financial Services (Power BI, SQL, Excel, Power Query, DAX)	Sep 2025 – Oct 2025
• Scrutinized a loan portfolio of 32,581 records worth £312.4M using SQL and Power Query, calculating KPIs such as default rate, loan-to-income (LTI), debt-to-income (DTI), and credit grades to evaluate portfolio performance. • Built a fully interactive Power BI dashboard with borrower segmentation, role-based Row-Level Security (RLS), and dynamic DAX measures, enhancing stakeholder-specific risk insights by 25%. • Conducted risk segmentation analysis combining claim probability, premium value, and customer demographics to identify high-risk borrowers with up to 5x default probability. • Enhanced data validation and variance tracking using Python and Excel, reducing reporting errors by 20% and improving overall data reliability. • Delivered actionable recommendations that optimized lending criteria and informed strategic decisions for risk mitigation and profitability improvement.	

Food Delivery Time Prediction Domain: Logistics (Python, Machine Learning)	Jun 2023 – Aug 2023
• Performed end-to-end exploratory data analysis (EDA) on large delivery datasets to identify key factors affecting delivery time, uncovering significant correlations with distance, order volume, and traffic density. • Implemented and fine-tuned seven regression models including Linear Regression, Random Forest, and XGBoost, achieving 83% prediction accuracy with XGBoost for optimal performance. • Developed visual analytics using Seaborn to communicate delivery trends and predictive outcomes, improving interpretability for non-technical stakeholders.	

CERTIFICATIONS

- **Microsoft Certified Professional:** Power BI Data Analyst Associate (PL-300)
- **Microsoft Certified Professional:** Azure Data Fundamentals (DP-900)

EDUCATION

M.Sc. Data Science University Of Essex, United Kingdom	Oct 2022 - Oct 2023
M.Tech. Integrated Software Engineering Vellore Institute of Technology, India	Jul 2017 – Jul 2022
